

MARINE WARRIORS AFTER SCHOOL PROGRAM

SEA ALL DOLPHIN SWIMS
AFTER SCHOOL PROGRAM GUIDE

SEA ALL DOLPHIN SWIMS OFFER AN
EXCITING AND EDUCATIONAL AFTER
SCHOOL PROGRAM IN
THE BELLARINE PENINSULA

OUR PROGRAMS

Looking for an exciting and educational after school program in the Bellarine Peninsula? Look no further than Sea All Dolphin Swims, your go-to experts for an unforgettable marine adventure!

With over 25 years of experience, we know just how to deliver a fun-filled after school program that combines local knowledge, environmental awareness, and plenty of hands-on activities.

Our team is passionate about sharing our love of the ocean with the next generation of Ocean Advocates, and we'll make sure your students leave with a deeper understanding and appreciation of our pristine marine ecosystem.

During our after school care activities, students will get to work out in the marine field, identifying local species and doing their part to remove plastic waste from our shores. They'll also have the opportunity to contribute to real data sets, helping to further our understanding of this amazing environment.

And of course, no visit to Sea All would be complete without a ride on our vessel, Maureen M, where students will get up close and personal with the playful Australian Fur Seals that call our local marine national park home. So come on board and join us for a day of learning, exploration, and unforgettable fun!

*Each weeks program **commences** at **4:30pm** and **finishes** at **5:30pm**. Late pick up fees apply.*

*Program is offered every **Tuesday, Wednesday, Thursday** of each week.*

PROGRAM ACTIVITIES

WEEK 1 - WELCOME TO THE GREAT SOUTHERN REEF

The Great Southern Reef is Australia's hidden treasure, a marine wonderland that rivals even the Great Barrier Reef in its beauty and biodiversity.

Imagine diving into the cool waters of the Great Southern Reef and encountering an underwater forest of towering kelp, home to playful seals and dolphins. Or exploring the rocky reefs and discovering colourful sponges, anemones, and corals.

Well now you can - from the comfort of our classroom! Students will utilise the Great Southern Reef live camera stream and Virtual Reality Headsets to conduct a biodiversity assessment of Popes Eye and support Victoria National Parks Association annual fish count.

WEEK 2- MICROPLASTIC SURVEY

Are you ready to embark on a scientific adventure?

Join the AUSMAP microplastic sampling project and help map the distribution of microplastics in Australian coastal waters! As a citizen scientist, you'll get the chance to investigate the Queenscliff foreshore and conduct a microplastic survey using an array of scientific equipment.

But your work doesn't stop there - the data you collect will be shared with AUSMAP, who will use it to create a comprehensive microplastic hotspot map. Your efforts will also inform policy and management decisions, and help identify areas where action is needed to reduce the amount of plastic entering the marine environment.

PROGRAM ACTIVITIES

WEEK 3 - PLASTIC RECYCLING WORKSHOP

Get ready to become a champion for the environment! Southern Ocean Environmental Link (SOEL) is hosting an exciting Plastic Recycling Workshop that will equip you with the knowledge and skills to make a positive impact on our planet.

In this workshop, you'll discover the devastating effects that plastics are having on the marine environment, including bioaccumulation and ocean acidification - two of the biggest challenges we face today. But don't despair - you'll also learn practical ways to tackle this problem head-on.

Using purpose-built machinery, you'll get hands-on experience breaking down plastic bottle tops, melting them down, and transforming them into brand new, usable products.

WEEK 4- WILDLIFE SIGHTSEEING TOUR

Are you ready to embark on a scientific adventure?

Join the AUSMAP microplastic sampling project and help map the distribution of microplastics in Australian coastal waters! As a citizen scientist, you'll get the chance to investigate the Queenscliff foreshore and conduct a microplastic survey using an array of scientific equipment.

But your work doesn't stop there - the data you collect will be shared with AUSMAP, who will use it to create a comprehensive microplastic hotspot map. Your efforts will also inform policy and management decisions, and help identify areas where action is needed to reduce the amount of plastic entering the marine environment.
